

Barcode Labels

Labels for Any Environment

Labels for Toolroom

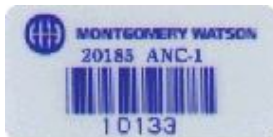

2-D barcodes fit in ultra-small places and withstand high heat and chemicals.

Polyester laminated labels with aggressive adhesive are the standard.

Labels for Assets or Documents

- Paper or Polyester
- Silver Polyester
- May be Laminated
- Black & White or Color

LABELS FOR CHECKMATE USERS

Barcode labels are available for virtually any environment from the labeling of assets and inventory to manufacturing cleanrooms and for freezers or high temperature environments. They are available for applications that have a need for special materials and adhesives, such as laboratories where labels are exposed to chemicals baths.

The labels range from tiny "dots" that are preprinted with 2-dimensional barcodes to very large labels that are used on rolls of paper.

Over the past 30 years, Dynamic Systems has tested a wide variety of label materials and adhesives; you can be assured the products you purchase are right for your environment.

WHY DO LABELS FALL OFF?

1. The important thing to know is that no label will stick to a dirty surface. Clean the item prior to adhering the label and you will avoid problems.
2. Purchase the right label material and adhesive for your environment. Let us know if you have a unique situation such as extreme temperatures or exposure to harsh chemicals.
3. Adhere the label to a spot on the item least likely to be rubbed or scraped.

CHECKMATE SOFTWARE

Toolroom: track your tools, equipment and consumables.

Stockroom: inventory control software.

Document Tracking: track important documents, files and/or file boxes and know where they are at all times.

Work Order Tracking: track manufacturing work orders to departments, workstations, etc.

Time & Attendance: track employee hours in/out, allocate to the job.
